

STATE OF NEW JERSEY
DEPARTMENT OF EDUCATION

A Memo from the New Jersey Department of Education

Date: January 13, 2021
To: Chief School Administrators
Route To: All Teachers
From: Jessani Gordon, Director, Office of Nonpublic School Programs
Division of Finance
Deadline: Notify teachers of grant opportunity by January 20, 2021

Requirement to Notify Teachers about Grant Program to Teach STEM in Nonpublic Schools

Legislation signed by Governor Murphy in August 2019 ([P.L.2019, c.256](#)) established a grant program that provides additional remuneration for public school teachers to teach Science, Technology, Engineering, and Math (STEM) classes in nonpublic schools during hours mutually agreed upon by the teacher, district, and nonpublic school. Eligible teachers must meet one of the following criteria: (1) hold certification to teach STEM; (2) be enrolled in a STEM program; or (3) provide a written commitment to pursue a STEM program within two years.

Key steps/actions

1. **By January 20, 2021**, public school administrators must notify all teachers employed by the district of the grant program and share this [survey link](#) for interested teachers to submit their contact information.
2. Teachers in participating in the program must submit their contact information via the survey by **February 19, 2021**.
3. Nonpublic schools that wish to participate in the grant program can request the list of interested teachers by emailing NonpublicSTEMGrant@doe.nj.gov or contacting their respective [Executive County Superintendent's office](#) after February 19, 2021. The nonpublic schools will contact teachers on the lists directly to pursue possible teaching arrangements.
4. Nonpublic schools that wish to participate in the grant program must submit the application, including an agreement to the teaching hours signed by the nonpublic school, school district administrator, and eligible teacher, by April 23, 2021. The grant application is located on the [Nonpublic School Services website](#).
5. Grant recipients will be announced in June, and teaching will begin in the 2021-22 school year. The teachers' remuneration will be based on their annual salary as calculated on a per-hour basis times the number of hours of instruction provided at the nonpublic school.

Background

The grant program is designed to incentivize teachers to obtain the necessary qualifications to teach STEM subjects, incentivize individuals to enter the teaching profession to fill the demand for qualified educators in STEM subjects, help address the difficulties public and nonpublic schools face in attracting qualified educators in the STEM fields, and improve statewide access to education in the STEM fields to address the workforce demands of New Jersey's economy.
